DEVELOPER PROFILE

My passion for web development was ignited by my first 'Hello World' program, which sparked an interest in the creative and technical aspects of building websites. Since then, I have been dedicated to learning and honing my skills in web development, constantly seeking new challenges and opportunities to grow.

Objective: Gain a web developer position to utilize my skills, grow and develop professionally, while creating and building things for the web.

SIMPLE PLAN

A Project Management app that is inspired by Trello's interface and functionality.

Learned: It helped me to significantly enhance my React and TypeScript skills, particularly in terms of component architecture, state management, and code organization. I also improved my proficiency in integrating APIs into a React App.

`React` `SCSS` `Redux` `TypeScript` `Strapi API`

NEWS WEBSITE

React-based news website utilizing the Guardian API to display latest articles.

Learned: I gained significant insights into responsive design principles and best practices, as well as a solid understanding of implementing TypeScript in a React-based application.

`React` `TypeScript` `SCSS`

NEXT BLOG

I built a blog using Next.js and Sanity.io as the content management system (CMS).

Learned: A lot about Next.js, including server-side rendering, routing, and dynamic page generation. Additionally, I significantly enhanced my proficiency in working with SCSS.

`Next.js` `SCSS` `Sanity API`
