DEVELOPER PROFILE

From the moment I typed "Hello, World!", I was hooked. I have since dedicated myself to learning and refining my skills in web development, always on the lookout for new challenges and opportunities for growth.

Each personal project below has been a stepping stone, providing me with new skills and valuable experience.

Now, I'm eager to transition this passion and knowledge to a professional setting, confident in the value I can bring to your team.

EDUCATION

Bachelor of Business Administration
Specialization in Project Management
Towson University, 2016

SOFTWARE

- Proficient in **HTML**, **CSS**, **SASS**, and **JavaScript**

- In depth knowledge of **React**, **TypeScript**, **Next.js**, **Tailwind**, and **Redux**

- Experience in using **Node**, **Express**, **MongoDB**, and **Mongoose**

RETRO GAMES

Full-stack e-commerce platform facilitating secure payments via Stripe API integration.

Learned: Deepened my understanding of e-commerce workflows, especially payment processing with Stripe. Further improved my ability to create servers with Node.

`Next.js` `TypeScript` `Redux` `Node` `Express` `MongoDB` `Mongoose` `Tailwind CSS` `Stripe API`

NEXT BLOG

Blog developed using Next.js, powered by Sanity.io as its headless CMS.

Learned: Deepened my grasp on Next.js features such as server-side rendering, routing, and dynamic page generation. Additionally, advanced my skills in SCSS styling.

`Next.js` `JavaScript` `SCSS` `Sanity API`

TEACHER

6+ years as an ESL instructor, primarily teaching young learners online.

I have also taught in-person in Beijing and Harbin, China.

Skilled in conveying complex ideas and catering to varied learning styles.

SIMPLE PLAN

Project Management app, inspired by Trello's design and features.

Learned: Strengthened my front-end capabilities, particularly in React and TypeScript. Deepened my backend understanding, focusing on Node, Express, and database operations with MongoDB.

`React` `TypeScript` `Redux` `Node` `Express` `MongoDB` `Mongoose` `SCSS`
